# Company Overview

**Kerwick's Earthworks Pty Ltd** provide an extensive range of services to business and industry in the domestic, industrial, commercial mining and rural sectors across the Surat Basin.

We are an independently owned earthmoving business based in Miles, with more than 30 Years of service in the Western Downs and Maranoa regions. Using a modern fleet of plant and equipment, we provide a complete range of specialist earthmoving services and solutions – even in the most challenging environments.

We pride ourselves on the close working relationships developed and maintained with the local engineers, surveyors and council staff, as well as specialised sub-contractors (e.g.: Civil Independence, Fulton Hogan, Civil Pipe Supplies, Boral and Telstra and Ergon contractors). These associations ensure we deliver quality work in an appropriate timeframe and to a high standard which the council has come to expect.

*When experience and local knowledge counts – you can count on us!*

## Directors

Dominic and Rachel  
Kerwick

## Our Services

Specialists in subdivision works and drainage for housing estates and government projects including water, sewer and stormwater construction, rural operations—setting up cell grazing with poly tanks and troughs.

- ◇ Excavation of large areas
- ◇ Site preparation—shed pads, foundations, etc
